SUMMARY

Software developer building low-latency systems, background automation, and data tools, from a multithreaded C++20 arbitrage scanner to Python and Java desktop applications.

Strong in concurrency, real-time networking, and data handling.

CORE SKILLS

- Python
- C++ (C++20)
- Java
- JavaScript
- HTML / CSS
- SQLite
- REST APIs & WebSockets
- PyQt6
- JavaFX
- pandas & Matplotlib
- Multithreading
- Git & GitHub
- Automation
- Software Architecture

PROJECTS

HFTScanner C++20

Aug 2026–Sep 2026

- Built a cross-exchange (Binance/Kraken) arbitrage scanner with real-time order book synchronization and checksum validation.
- Designed multithreaded networking, concurrent event processing, and a risk-gated execution engine.
- Binance execution verified live on testnet; Kraken unverified (no Spot sandbox).

FinanceTracker Python, PyQt6, pandas

Aug 2026

- Built a desktop app tracking income, expenses, savings, and accounts, with charts and CSV import.
- Added thread-safe asynchronous OpenAI insights with a local offline fallback engine.

FileOrganizerStealth Python, PyQt6

Feb 2026–Aug 2026

- Built a background utility that watches high-traffic folders and routes files by type to local or cloud destinations.
- Handled collisions and locked files; controlled from the Windows system tray.

CryptoBacktester Python, SQLite

- Built a crypto backtesting engine with SQLite data caching and exchange-gap detection.
- Models fees and slippage, with a full trade ledger and performance reporting.

FreelanceDashboard Java, JavaFX, SQLite

- Built a desktop app for managing clients, projects, time tracking, and invoicing, backed by SQLite.

EDUCATION

University of Silicon Valley

Computer Science (incoming, 2027)

American Islamic School, Canada

High School Diploma in General Studies (Jul 2026)

Harvard CS50x

Computer Science fundamentals (in progress)

FREELANCE

Independent software developer on Upwork, building desktop tools and automation.

[View Upwork profile](#)

LEARNING

C# and Unity

3D game architecture

LANGUAGES

Arabic (Native)

English (Fluent)
